

INTRODUCTION

OUR VISSION

Give someone a fish
and you feed them for a day ...

Teach them How To Fish
and you feed them for a lifetime!

MEMBERS PRESENTATION

First established in 1999, The Computer School Network is an interactive Online Computer and Technology Education Centre that has developed the World's Largest Online Technology Training Directory - currently with more than 10,000 Lessons and Tutorials available.

All Content is presented in; easy-to-follow quick lesson formats with clear, precise, step-by-step instructions guiding students all the way from Beginners to Advanced Levels of understanding and skill ...and anywhere in between!

THE RESULTS ...

**DRAMATICALLY ENHANCED
LEARNING OUTCOMES!**

IT SKILLS ARE ESSENTIAL

Simple, fast and effective computer and technology skills training has grown exponentially in demand across the globe and TheComputerSchool Network is now one of the most user-friendly and convenient places to be offering these services – all delivered via one very powerful, and secure Technology Training Directory ... All From The Comfort Of Your Own Home!

Our Technology Training Directory has been specifically created to provide all members with a valuable resource for fast and effective learning purposes. It's designed to deliver quick-lesson education across a suite of the most commonly used computer and technology programs, devices and applications etc.

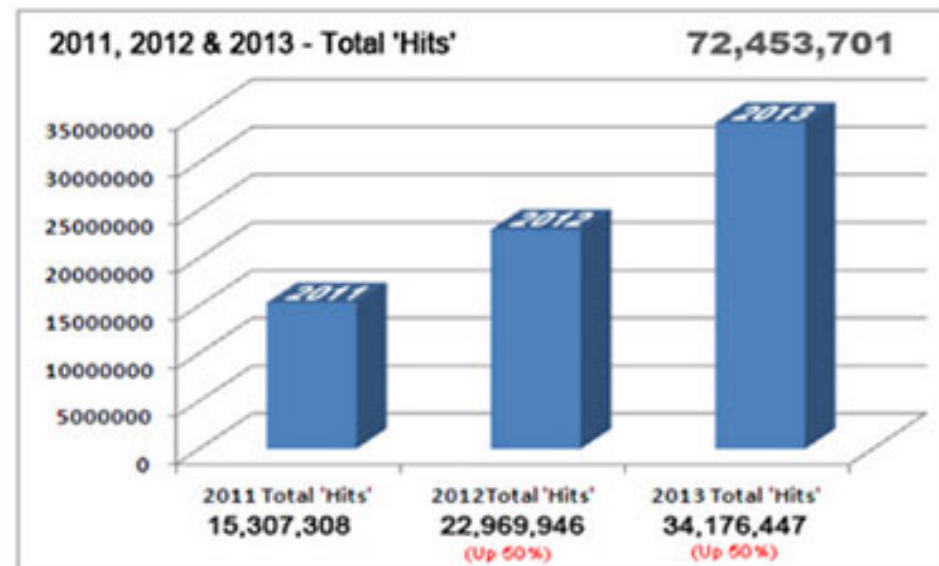

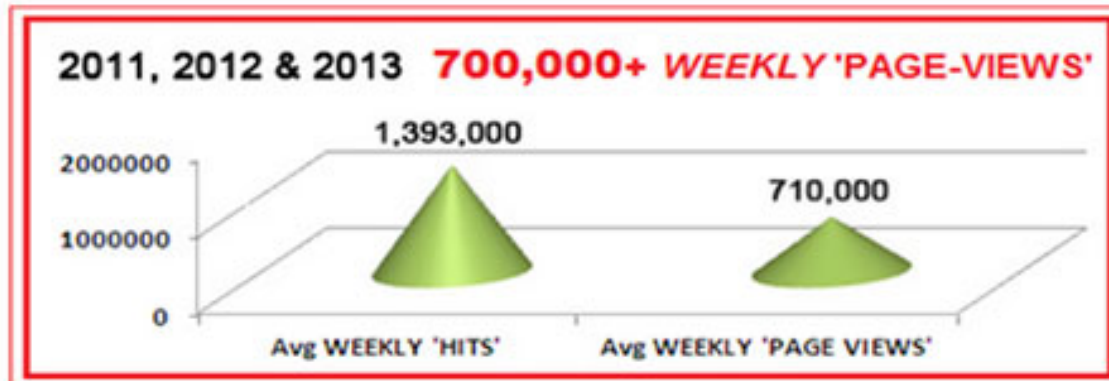

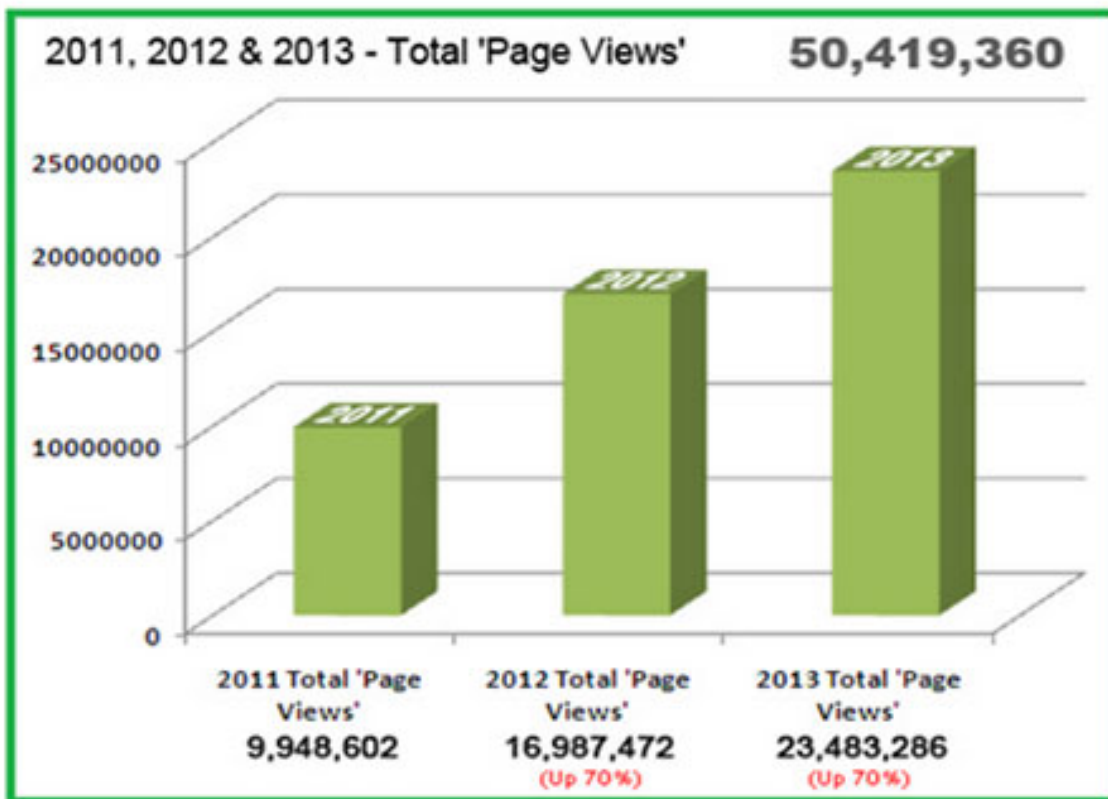

All registered members receive unlimited 24/7 remote access to thousands of tutorials and lessons ... there is no faster, more accurate or easier way to up-skill your computer and technology training requirements anywhere in the world.

WEBSITE STATISTICS (2011, 2012, & 2013)

MEMBERS PRESENTATION

Subsidiary Company ALEXA Rates TCS in the top One Percent (1%) of Global Websites

An
amazon.com
company

Alexa Internet, Inc. Is a California-based subsidiary of Amazon.com which provides commercial web traffic data. Founded as an independent company in 1996, Alexa was acquired by Amazon in 1999. Its toolbar collects data on browsing behaviour and transmits it to the Alexa website, where it is stored and analysed, forming the basis for the company's web traffic reporting. As of 2014, there are an estimated 200+ Million Websites around the world. The Alexa website is visited by more than 8.8 million people monthly.

N.B. TheComputerSchool is imbedded behind secure firewalls of thousands of learning institutions around the world therefore page-views cannot be externally gathered by third-party companies such as Alexa. TCS gathers all page-view data from secure portals directly from our ISP's and Servers. The Alexa Rating for TheComputerSchool is based on popularity of the website around the world according to only the 'metric data' collected by Alexa – this does not include ISP or Server Data.

"The school
is Great"

and administrators about our program. Privacy laws and
regulations do not permit us to reveal school identities.
TheComputerSchool affirms every comment is 100%.

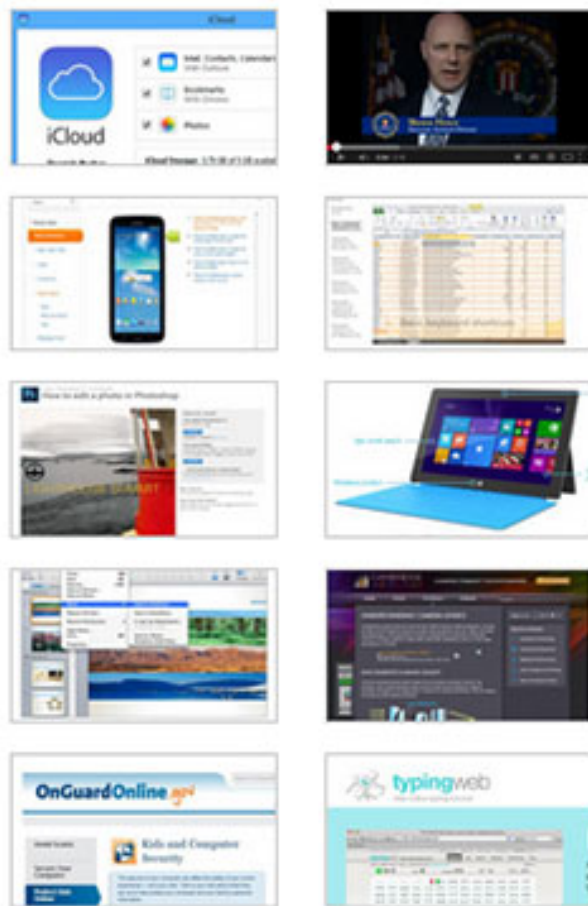

COMPUTER BASICS | INTERNET BASICS | LEARN TO TYPE

Welcome to our short, easy-to-master, web based education platform, dealing with: Acquiring Basic Computer and Technology Skills. Our goal is to give you a solid foundation. Once you have understood the basics, you will have a clear understanding to build your future knowledge on for the necessary skills to easily use and understand computers and technology in today's technology-based world.

Computer literacy is the knowledge and ability to use computers and technology efficiently. The Computer Basics tutorials' Range will give you the knowledge and confidence needed to understand just about everything you need to know to get started in the world of computers and technology.

Each section of our training directory contains a straightforward, self-paced introduction to these topics. To access information about any topic click on the topic's name you are interested in. There are thousands of lessons to choose from with easy to follow titles.

TheComputerSchool Dictionary/Encyclopedia has been purposely created and developed to offer: immediate, quick-response answer to thousands of computer technology-based 'Names' and 'Terms'.

Every Record Contains ...

- A Detailed Summary Description
- Links to Related Terms
- Images
- a one-click Wikipedia Link

IT's fast, IT's easy to use ...and IT's incredibly informative!

The screenshot shows the 'Computer Dictionary' interface. On the left is a 'Word Search:' sidebar with a search box containing 'JAVA' and a list of related terms including 'Jakarta Project', 'Java', 'Java applet', 'JAVA AWT Native Ir', 'Java Beans', 'Java Modeling Lan', 'Java Platform', 'Java Servlet', 'Java Web Start', 'JavaFX', 'JavaFX Mobile', 'JavaFX Script', and 'JavaScript'. The main content area displays the entry for 'Java', including a detailed description: 'Java is a programming language originally developed by James Gosling at Sun Microsystems (which is now a subsidiary of Oracle Corporation) and released in 1995 as a core component of Sun Microsystems' Java platform. The language derives much of its syntax from C and C++ but has a simpler object model and fewer low-level'. To the right of the text is an image of the Java logo. Below the text are sections for 'Related Terms' (listing C, C++, and Visual Basic) and a 'Wikipedia Link'.

8,000+ ICT related Terms & definitions with more than 22,000 associated Wikipedia Links.

You will also have available a choice of self-managed Certificate Courses specially designed to help you gain the necessary skills to perform successfully using various computer applications.

- Understanding Technology
- Technology and the Internet (Internet Safety & Social Media etc.)
- Technology and the Internet II (for Business)

Our online courses operate via stand-alone training modules - all inclusive of lessons, assessment and tests. (Approx. duration 25-40hrs). After completing the training, and successfully under-taking the assessment tests, you will then receive your personalised Certificate of Achievement, and a fully-personalised letter of recommendation detailing all the achieved learning outcomes. For adult students, it's a perfect addition for your régime and prospective employers.

MEMBERS ADMINISTRATION AREA

The Members (or Students) Administration Area has been specifically designed to give students; precise and instant access to different areas of the TCS Website, The Computer and Technology Training Directory and the general Management of Content that is undertaken.

This area of the site is very easy to understand and navigate and helps members greatly in the management of Modules/Tutorials visited for either personal, or certificate course usage.

Simply place your Cursor over different areas of the Student Administration Image for detailed information about each feature.
